INTRODUCTION

We Are Guided & Inspired By Our Vision

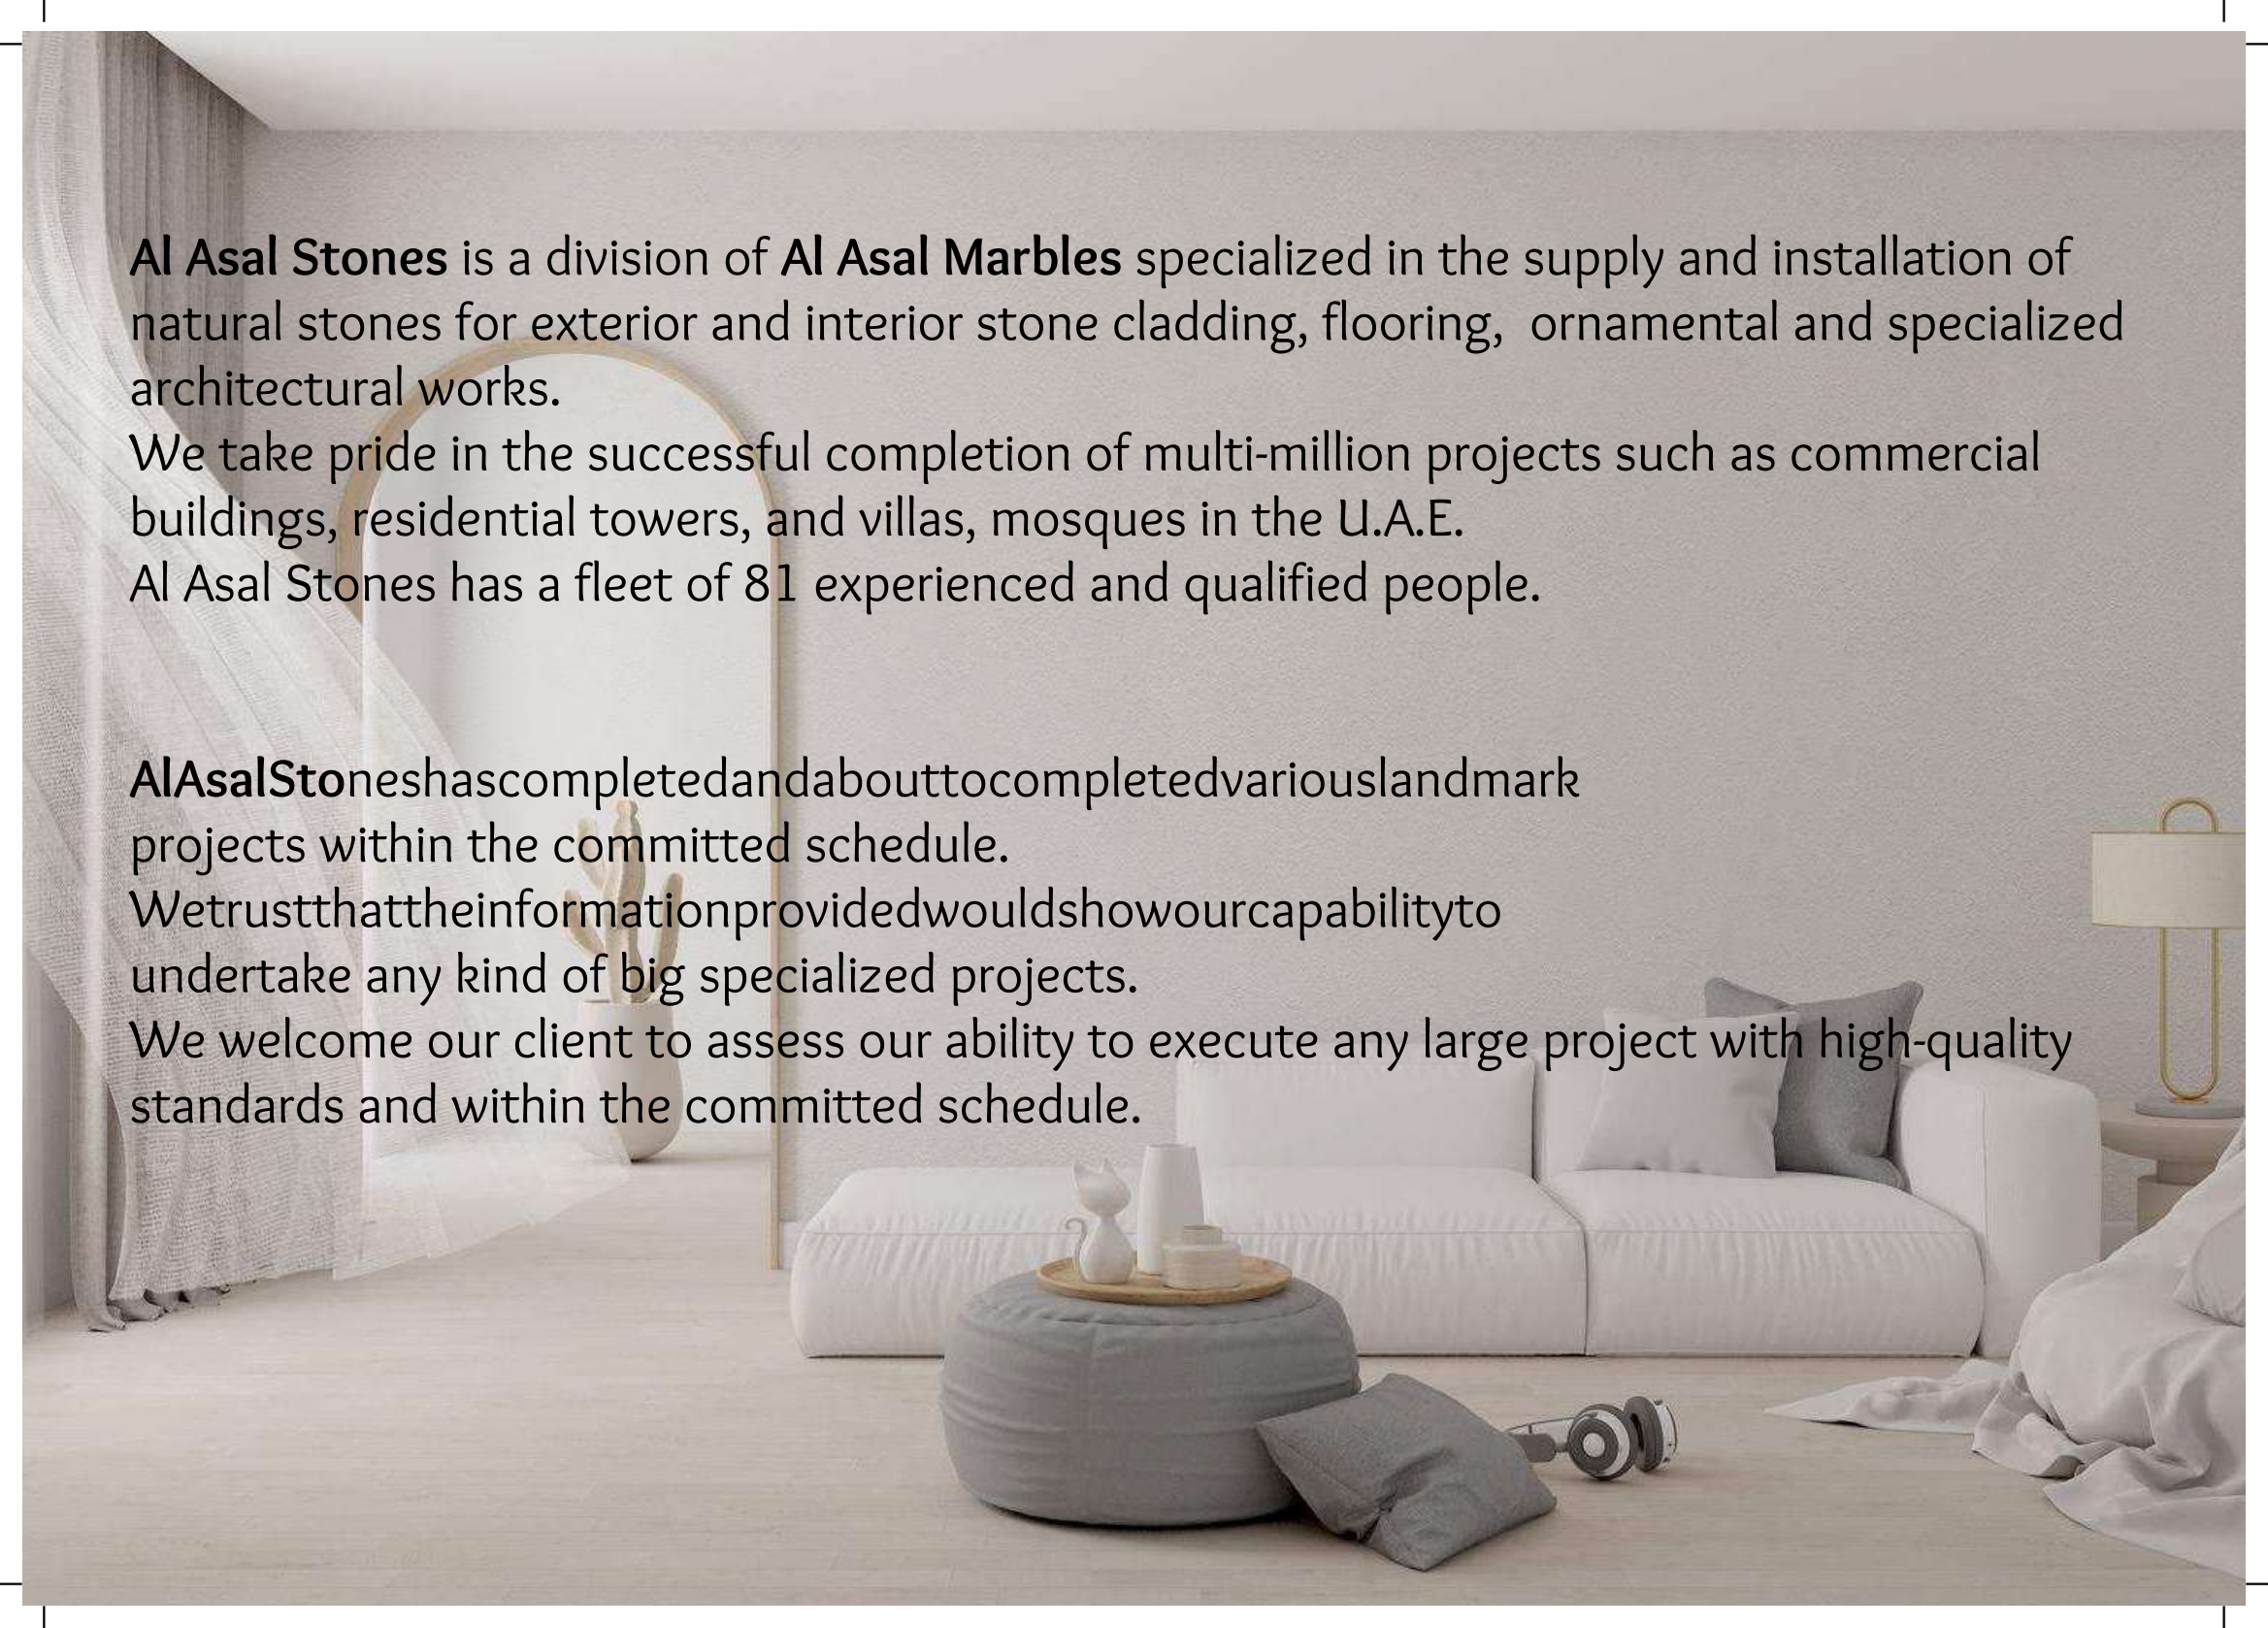

In the year 2000, our founder **Ajay Agarwal** whose vision was to create a Place that offered the absolute best selection of natural stone from all over the world. Over the Past 18 Years, The brand and aspirations have evolved to be the company that provides the absolute best Natural Stone in the Middle East (Granite, Marble, Onyx, Travertine, Limestone, Sandstone, Slates, Quartz). We have worked hard to enhance and expand our business. Bringing people and businesses together is what we do best.

Today, Al Asal is a leading natural stone company With **33.000 SQMT Stock Yard** focusing on the Best quality, Fair price, and client satisfaction

With our focus on being the market leader and providing a better quality of the natural stone, we have our granite processing units in India.

Al Asal has strong tie-ups with top suppliers from Italy, India, Brazil, Spain, Greece, Portugal, Turkey, China, Pakistan, Egypt, Saudi Arabia, and many more.

We also export to Saudi Arabia, Kuwait, Bahrain, Oman, Pakistan, and Iraq.

A modern, minimalist living room with a white sofa, a large arched mirror, and a potted plant. The room is bright and airy, with light-colored walls and a light-colored floor. The sofa is white with several pillows, and there is a large arched mirror on the wall. A potted plant is visible in the background.

Al Asal Stones is a division of **Al Asal Marbles** specialized in the supply and installation of natural stones for exterior and interior stone cladding, flooring, ornamental and specialized architectural works.

We take pride in the successful completion of multi-million projects such as commercial buildings, residential towers, and villas, mosques in the U.A.E.

Al Asal Stones has a fleet of 81 experienced and qualified people.

Al Asal Stones has completed and about to complete various landmark projects within the committed schedule.

We trust that the information provided would show our capability to undertake any kind of big specialized projects.

We welcome our client to assess our ability to execute any large project with high-quality standards and within the committed schedule.

CONTRACTING DIVISION

Supply & Installation of all kinds of Natural Stones and Quartz (Exterior and Interior Flooring & Wall Cladding Works)

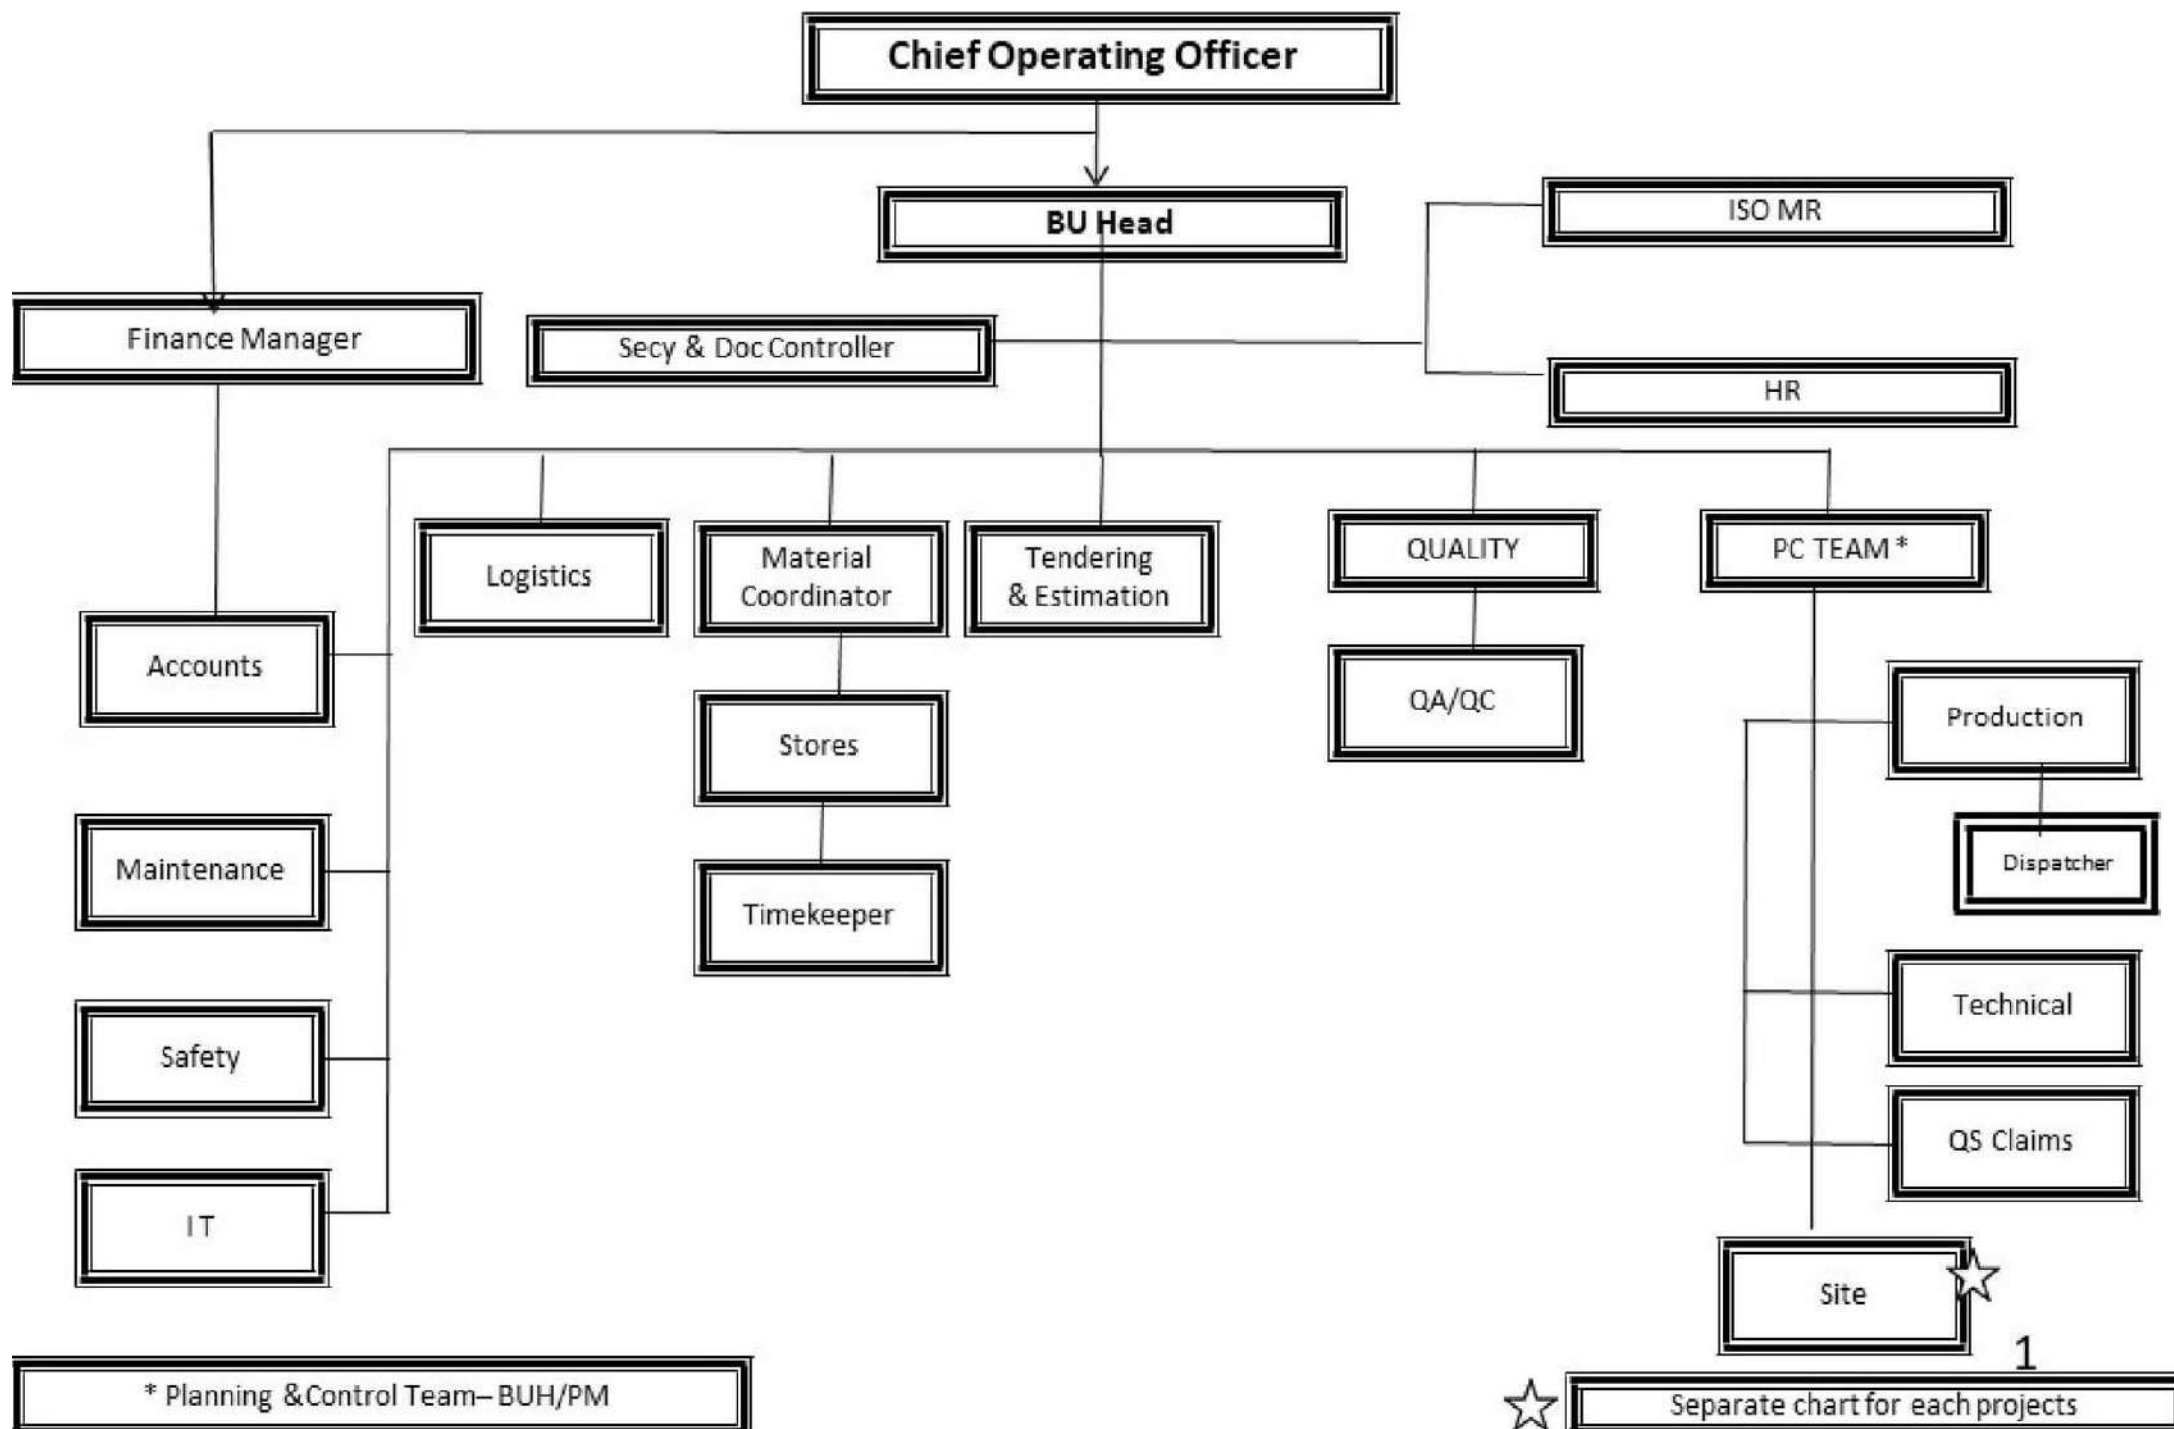

Supply & Installation of all kinds of Stones Works (Exterior and Interior)

Installing Outdoor Tiles

Installing outdoor tiles is much the same process as installing indoor tiles. The main difference is that, depending on the location, outdoor tiles may be subjected to standing water. This means it is critical to avoid air spaces beneath the tile. Air spaces may allow water under the tiles, weakening the adhesion and increasing the chances of tile failure.

Considerations

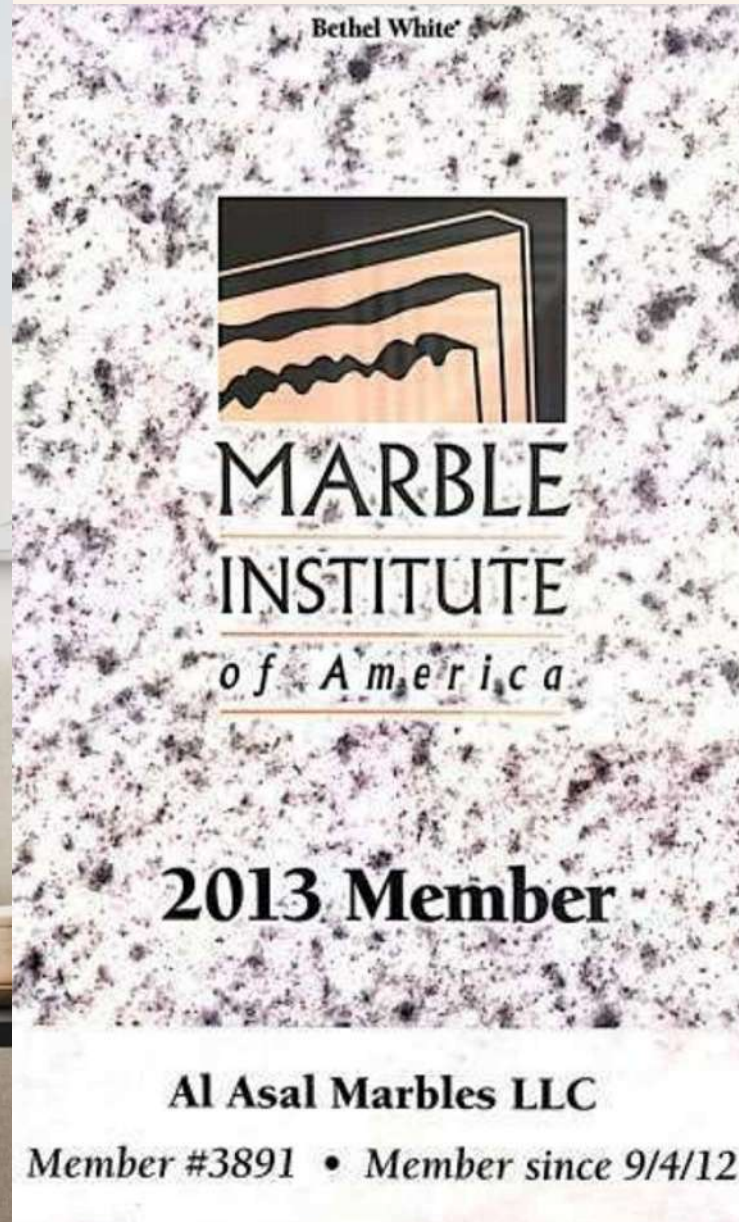

Choose tiles rated for exterior use. Popular outdoor tiles include ceramic, porcelain, and stone. Although thinner tiles will work on wall or bench areas, patio tiles are thicker and denser to handle foot traffic and prevent water absorption. Most outdoor patio tiles are unglazed, as glazed surfaces may become slippery when wet. Exterior floor tiles require a solid concrete base for installation; tiles for other outdoor areas, such as walls, need a firm substrate such as backer board or concrete block walls.

NATURAL STONE INSTITUTE MEMBER

QUALITY POLICY

AL ASAL MARBLES believes that by putting their best efforts, the best team, time management, planning with a stringent selection of materials that will establish their name as one of the known top stone installers and contractors in the U.A.E. Market.

QHSE POLICY STATEMENT

We are committed to achieving the highest level of Quality, Health, Safety and Environment while executing projects at the site to establish the best name in the Market.

Our main vision is to deliver a top class product to our clients which is expected by time within the contract condition.

We take care of following points upon receiving any work from the client.

Planning
Timely Completion

PREPARATION

Check all surfaces to make sure they are clean. Examine concrete patios for cracks or crumbling concrete. Remove any loose concrete and seal all cracks. Use concrete wash to clean the concrete prior to installation. Floor areas must be level.

A floor-leveling compound will even out small dips in the surface. If your patio area has large dips, multiple cracks or is very uneven, you may need to pour a sub base over the existing concrete. A sub base is a layer of floor-mix concrete that provides a flat, solid surface. Before you begin installing the tiles, make sure you have all necessary tools on hand. Outdoor patio tiles are thicker than indoor floor tiles, so you will need a wet saw to cut the tiles.

INSTALLATION

Plan the tile layout to minimize cuts. If your existing concrete slab has expansion joints, you need to plan the tile layout so that the tiles do not cover the joints. Instead, line up the joint line with a grout line. If you can't avoid tiling over the expansion joints, you will need to install a flexible membrane over the concrete before installing the tiles. Set the tiles using an exterior-grade thinnest mortar, working in small areas at a time to prevent premature drying of the mortar. Apply mortar to the concrete as well as to the back of the tiles; this prevents air spaces beneath the tiles. As you place the tiles in position, tap them lightly with a rubber mallet to ensure good bonding. Once all the tiles are in place, remove any spacers or excess mortar. Cover floor tile installations with plastic sheeting for a day or so until the mortar is set.

COMPLETION

Apply acrylic grout sealer to porous tile. Use a paintbrush to apply the sealer to the top of the tiles only. If you planned your tile layout to use an existing concrete expansion joint, insert a caulk backer rod between the tiles along the expansion joint line. Use an exterior grade grout mixed with a latex-fortified grout additive to grout the tiles. Clean excess grout from the tile and allow the grout to set. Remove the caulk backer rod when the grout has set, but before it has cured. Fill in the space left by the backer rod with latex caulk, tinted to match the grout. Apply acrylic grout sealer to the cured grout.

QHSE POLICY STATEMENT

We are committed to achieving the highest level of Quality, Health, Safety, and Environment while executing projects at the site to establish the best name in the Market. Our main vision is to deliver the top class product to our clients which are expected by time within the contract condition. We take care of the following points upon receiving any work from the client.

Planning,
Processing,
Installation,
HSE at site,
Timely Completion.

HSE Policy is the part of the entire project not only for our people, but it is being followed by our entire Sub – Contracting team.
